

I don't believe that the responsibilities and the obligations of a FCC license holder have changed since I obtained my license 53 years ago. At that time it was emphasized over and over that that a license holder has the responsibility to protect the usage of the public airwaves from abusive and offensive language and material.

I believe that the actions of Sinclair Broadcasting in their plan to force local stations to show politically charged material right before a national election is a violation of the law and of the principles of a democratic society.

I call upon the FCC to enforce the law and prohibit Sinclair from acting in a manner that is contrary to the public interest and violates the inherent criterion of our democracy.
